

前置准备：

耳机关机、Windows系统电脑、USB数据线、固件；

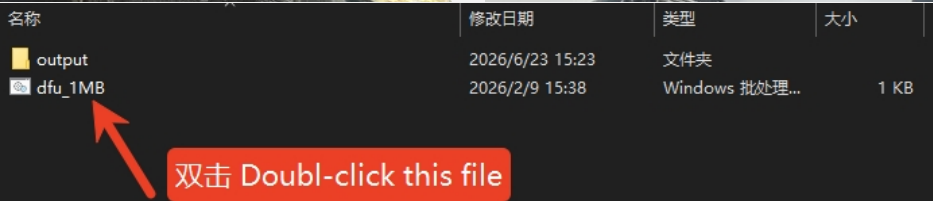

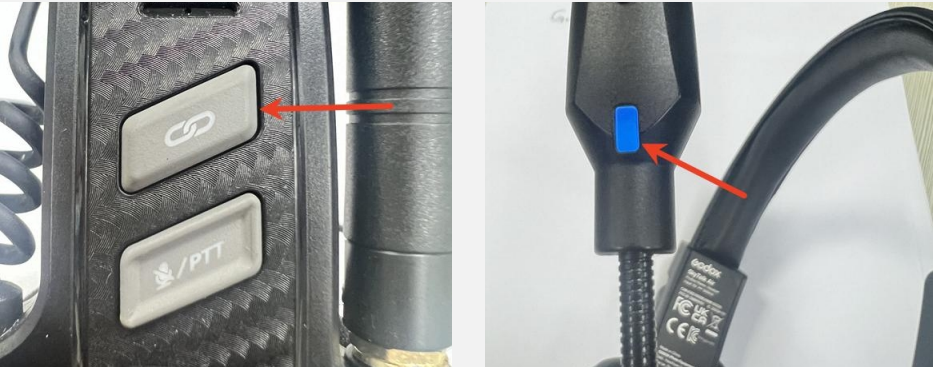

步骤 1：耳机关机连接电脑

耳机保持关机状态，将耳机与电脑使用数据线进行连接。

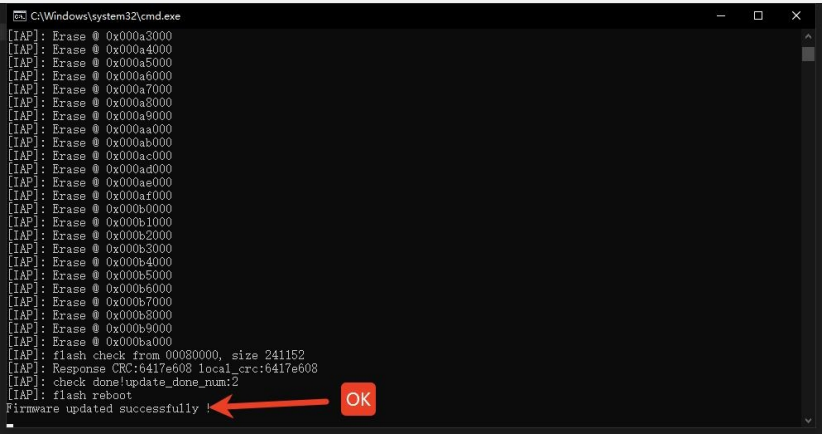

步骤 2：长按配对键进入升级预备状态

长按配对键 5 秒以上，直至耳机麦克风指示灯熄灭后松开按键，松开后 5 秒内双击电脑上的【dfu_1MB】升级文件。

步骤 3：等待升级完成

耳机自动进入升级模式，等待约 15 秒；命令行窗口弹出【Firmware updated successfully】字样即代表升级完成。

※ 注意事项

- 1.升级全过程禁止拔断 USB-C 数据线，中途断电会导致刷机失败、设备异常。
- 2.松开配对键后必须在 5 秒内双击升级文件，超时电脑将无法识别设备，需重新操作。
- 3.升级电脑暂仅支持Windows系统。

Preparations Required:

- Powered-off headset
- Computer(Windows system)
- USB data cable
- Upgrade file

Step 1: Headset powered off, connect to PC

Keep the headset powered off, then connect it to the computer via the data cable.

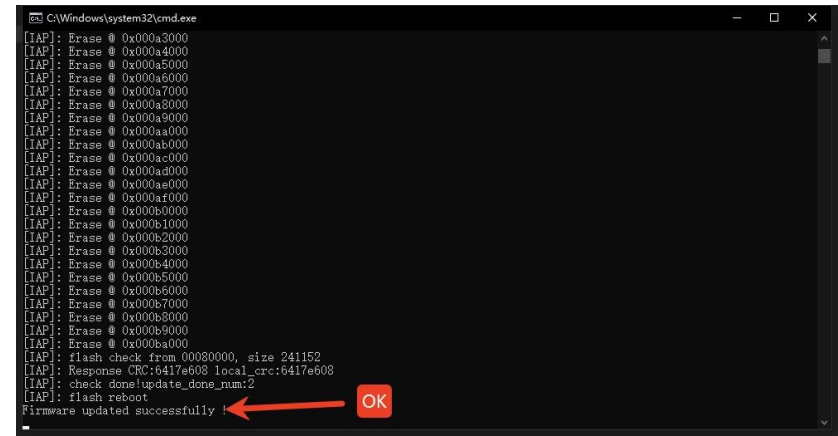

Step 2: Long press pairing key for pre-upgrade mode

Hold the pairing key over 5s until the mic indicator goes out. Double-click the 【dfu_1MB】 file on PC within 5s after release.

Step 3: Wait for upgrade completion

Headset enters upgrade mode automatically in ~15s. 【Firmware updated successfully】 in cmd window indicates successful upgrade.

※ Precautions

- 1.Do not disconnect the USB-C data cable during the entire upgrade process. Power interruption halfway will cause flashing failure and device malfunction.
- 2.Double-click the upgrade file within 5 seconds after releasing the pairing key. If the time limit is exceeded, the computer cannot recognize the device and you need to restart the operation.
- 3.The upgrade is only supported on Windows computers for the time being.
